Purpose or Gap:

Clinicians still are uncertain which preterm infants need a screening cranial ultrasound and for premature infants, which should get a screening MRI at FTE. This educational activity will provide the learner with information to best decide these questions.

Objectives: At the conclusion of this activity, the participant will be able to:

ACCME Objectives

1. Define trends in use of cranial ultrasound and MRI use in NICU infants
2. Describe the current incidence of ultrasound-detected pathology in premature infants

Learning Outcome

Learners will be able to identify and appropriately implement at least one strategy to better determine and manage cranial ultrasound and MRI imaging usage in NICU infants.

CME – ACGME/ABMS Competencies – medical knowledge, and patient care or procedural skills

ANCC Learning Outcomes

1. Define trends in use of cranial ultrasound and MRI use in NICU infants.
2. Discuss current incidence of ultrasound-detected pathology in premature infants.

ANCC IOM Competencies

1. Employ evidence-based practice.
